

DF series multidirectional diffusers

DF SERIES MULTIDIRECTIONAL SPEAKERS

CARATTERISTICHE

Diffuser, which can be used for both air intake and extraction in indoor environments, especially ceiling/ceiling. It consists of a flat white screen, spaced from the frame so as to spread air tangentially to the four sides, and a frame that also acts as a support for the screen.

The speaker's screen is the same size as the outside of the frame, of which only the outer edge remains in view.

DF speakers have the possibility of **adjusting** the gap that exists between the screen and the frame to two positions, 3 mm apart, by shifting the shim interposed between the springs and the screen (an operation by the customer).

The screen pulls out and inserts very easily for cleaning.

Materiali di costruzione

- Aluminum thickness. 1.5 mm for the screen.
- PVC color white RAL 9010 for the frame.
- Forex thick. 6mm for the insulation board on the non-visible face of the screen.
- Steel for clips (springs).

Screen color

White RAL 9010, with epoxy powder coating.

Fixing methods

- Steel clips (springs) for quick-release attachment of the screen to the frame. In addition, the frame has 2 nylon thread safety cables to be attached (by the customer) to two of the eight screen spring-fixing screws by unscrewing the nuts, inserting the eyelets under the washers, and screwing them back on.
- Mounting of the frame on the PAL plenum, if any, is quick-fit (see also the PAL plenum data sheet).

ACCESSORIES (optional)

- Contrast calibration damper (PVC frame and bayblend fins) series -S/02.
 - Plenum in "PAL" series PAL/02.
-

DIMENSIONS

Multidirectional diffuser DF 150x150

Code -DF/150X150B

With aluminum screen thickness. 1.5 mm white RAL9010.

- to increase the a bring a t a of the speaker is exposed lan guage s -- in for ex s p. 3 mm below the springs : the a crack perimeter will measure 17 mm instead of 14 mm.

Multidirectional diffuser DF 225x225

Code - DF/225X225B

With aluminum screen thickness. 1.5 mm white RAL9010.

- * to increase the a bring a t a of the diffuser le language · tn for ex s p. 3 mm below the molla: the a c e s s u r e p e r i m e t e r b e t w e e n w i l l m e a s u r e 17 m m i n s t e a d o f 14 m m.

DIMENSIONS

Multidirectional diffuser DF 300x300

Code - DF/300X300B

With aluminum screen thickness. 1.5 mm white RAL9010.
