

Galvanized sheet metal adapter extensions

EXTENSIONS FOR GALVANIZED SHEET METAL ADAPTERS

CARATTERISTICHE

Galvanized sheet metal extension for VMAD adapter, useful depth 30 mm (additional to adapter depth).

Materials of construction:

sheet steel zn. 1 mm thick; the cardboard template provided on the mouth of the adapter can be moved, in place, to match the mouth of the extension

Installation locations:

in conjunction with the corresponding adapter; the extension cord can also be used in applications for floor systems.

Fixing methods:

can be attached to the adapter by means of screws (not provided), both the adapter and the extension having two Ø 3.5 mm holes on each adapter/extension side that come to match after the adapter is inserted into the extension

ACCESSORIES

- 3 mm thick adhesive insulation strip mod. VMSIPRO, unique for all extension cord models, 1 m in length and 5 cm in height. Cuttable in place
