

External folding grid

FOLDING OUTDOOR GRILL MOD. VMGRESIR160

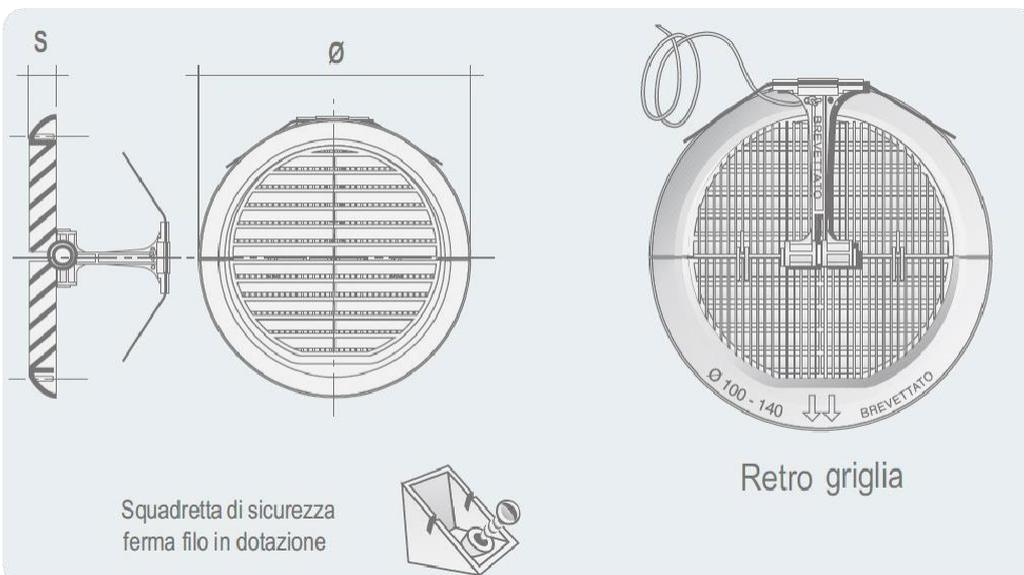

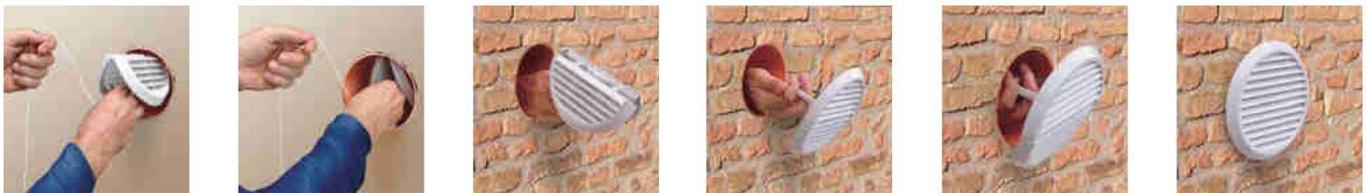

CARATTERISTICHE

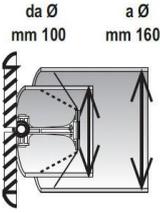

The 'INSIDE>OUT,' practical, safe, sturdy, innovative grid allows installation from the inside without any use of ladders or scaffolding resulting in significant economic benefit. The simple installation maneuver makes it just as easy to bring the grid back inside for eventual cleaning.

This feature also offers the possibility of quick and easy replacement of other unsuitable or time-worn external grid. The grid comes with a safety wire that allows the maneuver of positioning outside to be performed with peace of mind should it get out of hand.

GRID INSTALLATION
