

VMA60-FLATPRE wall preparation for "FLAT 60" and "PANEL 60" series HRV units

"VMA60-FLATPRE" EPS WALL PASSAGE PREPARATION FOR "FLAT 60" AND "PANEL 60" SERIES DECENTRALIZED HRV UNITS

FEATURES

Provision of template within the masonry for subsequent installation of the **FLAT 60** or **PANEL 60** HRV unit piping.

Material: cuttable sintered Expanded Polystyrene.

Installation: the arrangement should be inserted, perfectly "level",

inside the masonry (leaving the cylindrical part* inside). Make sure that the face on outer wall is the one that allows water (should it form) to escape through the 1% slope already provided for the cylinder itself.

* Remove the cylindrical part just before inserting the tube of HRV unit.
