

# AIRBOX distribution box Ø 125 in PP

---

## AIRBOX DISTRIBUTION BOX Ø 125 PP

---

---

### CARATTERISTICHE

---

Box made entirely of PP (poly-propylene) antistatic and antibacterial, rapid and economical type, consisting of the coupling of two (or three) Ø125 multifunctional adapters, after removing the intermediate Ø125 diaphragms and joining them together with plastic threaded rods. See also the related data sheet (wall adapters) for the dimensions and characteristics of the Ø125 adapters.

Adapter collars are GREY Ø75 or Ø90 type, with closed diaphragm. Sealing rings (gaskets) for Ø75 or Ø90 semi-rigid pipes are already included within the GREY collars; they should be installed on the first throat of the pipe itself.

#### Possible installations:

installable on the wall or even on the ceiling and counter-ceiling.

---
