

"əirpiu" system components for semi-rigid pipes

FEATURES

The AIRPIÚ system includes a set of PP couplings for joining two round Ø75 and/or Ø90 semi-rigid pipes.

For straight joints each coupling is composed of two 'Grey' collars (Ø75 and/or Ø90) and of a PP threaded union nut.

For curved joints each coupling is composed of two 'Grey' collars (Ø75 and/or Ø90), of two PP threaded union nuts and of a PP threaded curve.

The 'Grey' collars that make up the system are deprived, during production, entirely of the adjusting cap/nut; they are therefore completely free-flowing.

Each of the six articles shown below is marketed already assembled. Each article is made of anti-condensation, impact-resistant PP (polypropylene) with low localised pressure drop.

Connecting the pipes is very easy: it must be done by first installing, on the outermost groove of the semi-rigid pipe, the relevant gasket, i.e. the sealing ring **included** into the 'Grey' collars.

In addition, the PP anti-slip ring (not included) can be installed for additional safety .

IMPORTANT NOTE. Apart from the 'GREY' threaded collars, **no individual** components (PP nuts, PP threaded curves) of the AIRPIÚ system are available.

STRAIGHT JOINT (SLEEVE) FOR Ø75 PIPE code VMGI186375AP

STRAIGHT JOINT (SLEEVE) FOR Ø90 PIPE code VMGI187590AP

90° CURVE FOR Ø75 PIPE code VMC1875AP

90° CURVE FOR Ø90 PIPE code VMC1890AP

90° REDUCED BEND FOR Ø75-Ø90 PIPE code VMRC187590AP

REDUCED JOINT FOR Ø75-Ø90 PIPE code VMRD187590AP

EXAMPLES OF PP JOINT ASSEMBLY USING SEALING RINGS (INCLUDED) AND ANTI-SLIP RINGS (OPTIONAL)

Ø75

Ø90

FLAT PP FLOW REGULATORS code VMRP1875 for Ø75 , code VMRP1890 for Ø90 (measures in mm)
