

Hose clamps

HOSE CLAMPS -N/01 series

FEATURES

Hose clamps made with a stamped rack ring, featuring raised and rounded edges to prevent damage to the hose.

Construction Material:

The ring and housing are made of low-carbon alloy steel with a nickel-plated galvanic coating. The slotted screw is made of zinc-plated steel.

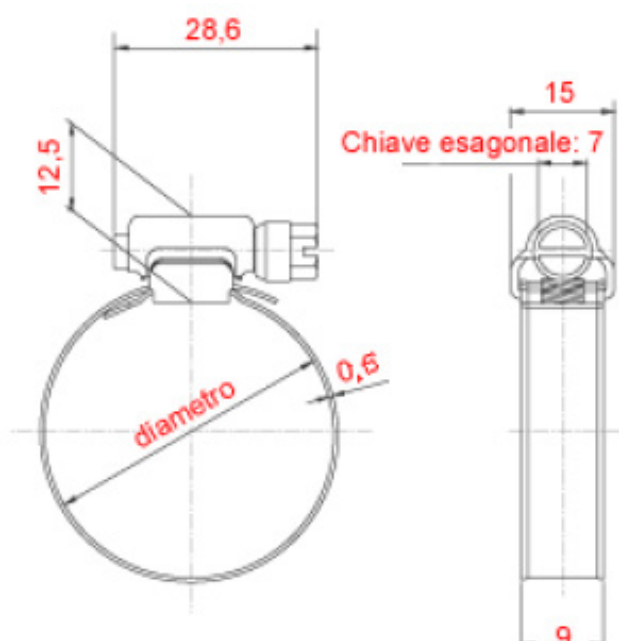

Size:

Ring width: 9 mm; thickness: 0.6 mm.

Characteristics:

High clamping and sealing capacity for demanding applications; excellent tightening torque performance ensured by the housing closure with a welding point and by the perfect coupling of the screw/rack mechanism lubricated with grease.

DRAWING

Code **-N/0160-135** for hoses from Ø 60 mm to Ø 135 mm

Code **-N/0160-215** for hoses from Ø 60 mm to Ø 215 mm

Code **-N/0160-380** for hoses from Ø 60 mm to Ø 380 mm

Code **-N/0160-660** for hoses from Ø 60 mm to Ø 660 mm
