derivazioni ad y in pvc

DERIVAZIONI AD Y IN PVC SERIE -Y/01-AP

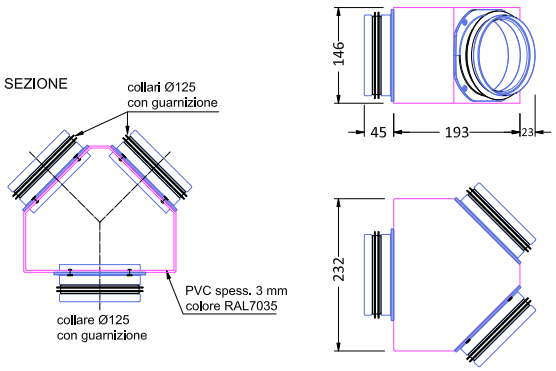

CARATTERISTICHE

Derivazioni ad Y realizzate in PVC anticondensa di spessore 3 mm, adatte per lo sdoppiamento delle linee dei condotti flessibili.
Dotate di un ingresso principale (D1) realizzato con collare in PP con guarnizione* e di due uscite secondarie (D2 e D3) con collari in PP con guarnizione*. Le uscite ai canali secondari sono perfettamente simmetriche.
* Le derivazioni a Y hanno l'attacco Ø250 che è, invece, realizzato con collare ovale.

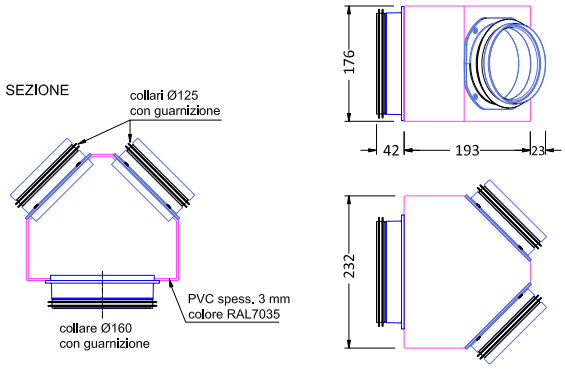

CODICE	DIAMETRO NOMINALE (mm)		
	øD1	øD2	øD3
-Y/0190X75X75AP	Ø90 "Grey"	Ø75 "Grey"	Ø75 "Grey"
